- _____

Wildflower Trivia and Folklore

1. Bruise the 2 joined corms of this plant and add a small amount of water – what results is a cement strong enough to repair broken china. _____
2. Called the American Valerian by the early settlers. _____
3. When dried, this plant is fragrant and was used as filling in pillows and mattresses. _____
4. Native Americans used the blood-like juice from the root of this plant as paint. The juice also has medicinal uses ranging from treatment of jaundice to an expectorant for treating bronchitis. _____
5. Other names for this plant include Coolwort and Snowflake. Coolwort because a tea made from the leaves was used to treat fever. Snowflake because the delicately fringed intricate petals symmetrically resemble snowflakes. _____
6. Because the cooked or dried fruit and peppery root were important foods for Native Americans and early settlers, this plant is sometimes referred to as Indian Turnip. _____
7. This plant came close to extinction in the early 1900's because it was harvested in such large quantities for medicinal use as an antibiotic. Historically also used by Native Americans and settlers as a tonic, astringent, insect repellent and yellow dye. _____
8. Called "Dogtooth Violet" because the underground bulb is white and tooth-like in shape. The brown mottled leaves resembling a certain fish species are a clue to the name of this plant. _____
9. Each 3-petaled flower of this plant lasts only a day. _____
10. A parasite, this plant gets its nourishment from the roots of trees. _____
11. The 3-lobed leaf of this plant supposedly resembles the human liver and for this reason early herbalists thought this plant effective in treating liver ailments. _____
12. Sometimes called "Doll's Eyes" because the shiny white fruits resemble the china eyes once used in dolls. Note: These fruits are extremely poisonous! _____
13. The oil from the leaves of this plant is used to make Earl Grey Tea. _____
